2. Modify or add to general description of report as prepared for inclusion as introductory page of RIV and Corona test reports.

3. Describe procedures for tests at Bethea and at Baltimore and include reason for not performing tests on VI and VI-A. Include tests on individual items as made by Bethea and Brewer-Titchener where applicable.

4. Include sketches of each assembly, as arranged for test, showing method of application of load. Include photos of test arrangement or items tested as applicable. Also include name plate and other data on test machines.

M&E Test Report

Include an introductory paragraph summarizing tests and stating that the test results demonstrate that all provisions of specification have been met. Be sure to include all tests and data required by the standards for each type insulator unit.
